

Rakshak

Autonomous Weapon Station

Overview

Rakshak transforms MMGs and assault rifles into autonomous weapon stations. It is fully compatible with standard MAG 2A1 MMG and assault rifles of various makes. Rakshak combines long-range stereo vision, advanced autonomy, precision, and modularity, with significant advantages over remote controlled weapon stations.

Applications

- Fixed deployment at bunkers and watch towers
- Mobile deployment on armored vehicles, legged robots, UGVs, and USVs
- Mission-specific custom optics
- Optional human-in-the-loop control
- Networked autonomous defense shield for large-area protection

Specifications

Specification	Value
Vision	Integrated day and night camera with long-range stereo vision
Effective Range	1800 m
Human Recognition	Day - 2 km, Night - 1 km
Weight	Less than 45 kg
Ballistic Correction	In-built ballistic correction
