

VRISHABH

UNMANNED GROUND VEHICLE

KEY FEATURES

Multi-Mode Operation

Supports manual, semi-autonomous, and fully autonomous modes for mission flexibility and control.

Combat-Ready Platform

Capable of integrating multiple weapon systems for direct engagement in hostile environments.

High Payload Capacity

Engineered to carry heavy mission loads including weapons, supplies, and evacuation support systems.

Extended Operational Endurance

Designed for prolonged missions with sustained performance across diverse terrains.

All-Terrain Mobility

Robust mobility system ensures reliable performance in rugged, off-road, and combat zones.

Mission Versatility

Adaptable for combat roles, logistics support, surveillance, and casualty evacuation operations.

VRISHABH COMBAT UGV

Vrishabh Combat UGV is a rugged, mission-adaptive unmanned ground platform engineered for high-risk battlefield operations. Designed for precision, endurance, and versatility, it seamlessly supports combat, logistics, and casualty evacuation roles. With multi-mode operational capability, Vrishabh enhances force protection while extending operational reach in complex environments.

• SPECIFICATIONS •

Maximum Speed
50 km/h

Endurance
6 Hours

Operational Range
100 km

Battery Capacity
16 kWh

Weapon Compatibility
MMG, LMG, AGS-30

Payload Capacity
150 kg

MULTI-ROLE CAPABILITIES

MMG & AGS-30
INTEGRATION

LOGISTICS
SUPPORT

CASUALTY
EVACUATION
